

JeffSTAT Pre-Hospital Registered Nurse Training Program

**Prepare for a career in an Emergency Medical Services
or critical care transport system**

The JeffSTAT Pre-Hospital Registered Nurse (PHRN) Training Program is a 14-week intensive program that prepares the experienced Registered Nurse accustomed to practicing in a controlled hospital environment to practice in an autonomous, uncontrolled, out-of-hospital setting. PHRNs provide nursing care under the guidance of a pre-determined set of treatment protocols approved by a system medical director and usually practice in an Emergency Medical Services (EMS) or critical care transport system. Our program will prepare students to take both the National Registry EMT practical examination and the Paramedic Assessment (computer-based written examination). Students will also gain the knowledge and skills necessary to successfully care for patients in the pre-hospital and inter-facility settings.

Course Highlights

- Instruction from practicing Critical Care PHRNs and Paramedics
- Pre-Hospital Trauma Life Support (PHTLS)
- Neonatal Resuscitation Program (NRP)
- Extra-Corporeal Membrane Oxygenation (ECMO) Training
- Ventricular Assist Device and Balloon Pump Training
- Clinical experience at Thomas Jefferson University Hospital and Jefferson Hospital for Neuroscience
- Field internship with JeffSTAT Flight and Ground Critical Care Transport and other local EMS Providers

Prerequisites

- Current PA RN license in good standing with no disciplinary actions
- 2 years of ED or ICU experience
- Current AHA certification in BLS, ACLS and PALS

Course Schedule

- Every Wednesday, 8am - 5pm;
January 17, 2018 through April 25, 2018
- EMT Practical Skills testing, TBD
(Likely April 21, 2018)

Tuition

- \$3,500 (includes \$500 registration fee, required texts and uniform shirt)

Register online at Jefferson.edu/PHRN
